

Cloud Enablement Services — Microsoft 365 Security Technical Workshop, Technical Walkthrough and Self-Paced (On-Demand) Class

As businesses move workloads to the cloud, efficient security management across solutions of all types becomes critical. Organizations need to take a proactive approach to managing identities, devices and data in cloud, on-premises and hybrid environments. What's more, the volume of data generated by IT infrastructure can lead to information overload and missed threats if not managed properly.

Microsoft and TD SYNEX have a solution. Microsoft 365 consolidates data, allowing security teams to focus on the most pressing issues.

Join TD SYNEX and discover how to improve your customers' security posture with Microsoft 365 security features. We'll review how to boost visibility, control and guidance while leveraging Microsoft's extensive security experience and shared intelligence.

Benefits for attending:

- In-Depth Technical Training
- Security Terminology
- Defender Suite Review
- Security Portals Review
- Data Loss Prevention Policies

Feature Demonstration

- Passwordless Authentication
- Conditional Access
