

Cloud Enablement Services

Azure Arc Technical Workshop, Technical Walkthrough and Self-Paced Class

Azure Arc is a comprehensive set of Azure services that extends Azure's management and services to resources outside the Azure cloud environment. This allows organizations to manage, monitor and govern resources across on-premises, multi-cloud and edge environments using Azure's powerful management tools and services. Azure Arc addresses hybrid and multi-cloud challenges, enabling a consistent, unified approach to managing and securing resources, regardless of their location.

Let TD SYNnex assist you in gaining experience and understanding of best practices for this essential tool.

Benefits for attending:

- **Resource Management:** Single pane of glass for managing all resources
- **Governance and Compliance:** Consistent compliance and security standards across all environments.
- **Monitoring and Insights:** Visibility and control over performance and health of resources.
- **Data Services:** Run Azure data services on-premises or in other cloud environments.
- **Kubernetes Management:** Simplified deployment, configuration and security of applications.
