Azure Backup and Azure Site Recovery Technical Workshop, Technical Walkthrough and Self-Paced Course

As organizations migrate critical workloads to Microsoft Azure, a robust business continuity and disaster recovery (BCDR) strategy is essential. Azure Backup and Azure Site Recovery (ASR) offer simple, secure and cost-effective solutions for data backup, replication and recovery, minimizing downtime and data loss. BCDR requires ongoing management and TD SYNnex experts can educate you in setting up these solutions and share best practices.

Let TD SYNnex assist you in gaining experience and understanding of best practices for this essential tool.

Benefits for Attending:

- In-Depth Technical Training
- Administration and Maintenance
- Best Practices

Azure Backup

- Backup Features
- Backup Policies
- Backup Agents
