

## Cloud Enablement Services — Microsoft Power Apps Technical Workshop, Technical Walkthrough and Self-Paced (On-Demand) Class

Microsoft Power Apps give you the ability to create powerful business apps that run on phones, tablets and browsers to pull data from hundreds (or more) of sources such as Salesforce, Adobe, Amazon and many others. This beginner-level workshop teaches how to build a line-of-business app faster with less code or no code, automate business processes with out-of-box connectors and utilize built-in solutions for common use cases.

In this workshop, we'll explore how to leverage Power Apps and turn an Excel workbook into a simple business app that can be used on a mobile device or in a browser.

### We'll Cover:

- Getting started with Power Apps
- Tools included with Power Apps
- Licensing and pricing requirements
- Environmental requirements
- App customization
- Review various source data Power Apps can pull from
- Design, test and publish new apps using best practices
- Administration and maintenance of Power Apps

This class focuses on the fundamentals of Microsoft Power Apps. We are excited to continue our educational journey with upcoming 200 and 300 level classes, delving deeper into the technical aspects and focusing on Power BI, Power Automate, and Power Virtual Agents. Stay tuned for more details!
